Employing novel teaching strategies, methods, technologies and knowledge to increase learner quality of experience, improve learning process and cognitive development.

**CORTTEX - Employing novel teaching strategies, methods, technologies and knowledge to increase learner quality of experience, improve learning process and cognitive development Curriculum is ready**

CORTTEX is a large-scale initiative to develop, integrate and disseminate innovative educational strategies. CORTTEX enhances learning methods and tools to create new or inter-connect existing state-of-art cognitive teaching lessons and to

build a European learning network platform that supports fast dissemination of learning content to a wider audience in a ubiquitous manner. CORTTEX focuses on employing novel teaching strategies, methods, technologies and knowledge in order to increase learner quality of experience, improve learning process and cognitive development, increase learning outcome.

During the project implementation, the CORTTEX Partnership has developed important training materials following 3 main directions: a) implementation of the curriculum in practice; b) cognitive education and neurodidactics in theory

and practice; c) the child with learning difficulties and educational support needs. This training material is paramount to the e-learning platform to be used for the training of teachers from mainstream and special education, on approaching learning difficulties and teaching in the classroom.

The e-Learning platform is meant to enhance the training of professionals in the use of new teaching strategies, methods, technologies and knowledge in order to increase the quality of the student experience, improve the learning process and cognitive development.

The training is addressed to teachers of special and general education who are either experienced, newly appointed or unemployed, as well as psychologists, speech therapists, school counsellors, occupational therapists or social workers.

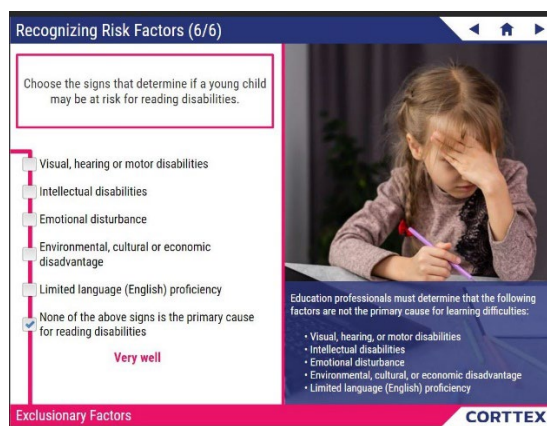

The training, based on the training materials developed by the Partnership, includes 8 digital courses covering important topics in the education of children with learning difficulties, an e-book and a

final knowledge certification questionnaire that leads to the automatic issuance of a Certificate of Attendance.

It has been thoroughly tested by the partnership and now it is ready to be tested by the targeted groups. It is available in English, Greek, and Rumanian.

Visit the website <https://cortex.eu/index.php/el/> Navigate to the platform, select "e-learning" to connect to the training site and register by 15/5/2023.

You can complete the tutorial in your own time within 2 months of registration.

## CORTTEX Project Partnership

**University of Bucharest (RO):** It is considered to be the most important educational, research and cultural institution in Romania and one of the most important scientific research centres nationwide. Within the University, there are over 50 research institutes, departments and centres, most of them collaborating with similar scientific centres abroad. The University of Bucharest is part of a reliable network of international collaboration – 300 bilateral collaboration agreements have been signed with universities in 52 countries. [www.unibuc.ro](http://www.unibuc.ro)

**University of Macedonia (GR)** The Department of Educational and Social Policy at the University of Macedonia is the only Department of Higher Education in Greece that is responsible for training teachers and other professionals working with children with Autism Spectrum Disorders. The Department implements contemporary teaching models on Autism Spectrum Disorders and places students for apprenticeships in special, mainstream, preschool, primary, secondary, technical vocational school units all over the country as well as in institutions abroad through several programs like Erasmus, AISEC, etc. [www.uom.gr](http://www.uom.gr)

**TEACHER TRAINING CENTRE BUCHAREST - CCD (RO)** The mission of the centre is to promote innovation and education reform, optimal framework for the professional and personal development of pre-university education staff, and to ensure the continuous training of the pre-university education staff. Activity areas: training of pre-university education staff, field of methodical, scientific and cultural activity, information documentation consulting, offer of continuous annual training through accredited / approved courses, initiation, development and implement of continuous training programs [www.ccd-bucuresti.org/](http://www.ccd-bucuresti.org/)

**Inte\*Learn (GR)** INTE\*LEARN was founded in April 1989 by a team of experts in Computer Assisted Learning. It aims at introducing and consolidating information technology in the educational process. It is specialized in instructional design and implementation of digital educational environments and applications; implementation of tests to measure developmental characteristics of students (ie language difficulties); implementation of tools to support the educational process, and research and development [www.intelelearn.gr](http://www.intelelearn.gr)

The **European Association for Mental Health in Intellectual Disability (EAMHID)** provides a platform for academics, health professionals and policy makers. The purpose of the Association is to facilitate international cooperation and exchange of knowledge and experience in the field of mental health in people with an intellectual disability [www.eamhid.eu](http://www.eamhid.eu)

Welcome to our newsletter! We will keep you updated of what we have been doing in the framework of the **CORTTEX project**, including events and the outputs produced by this Erasmus+ initiative
